

Jonathan Schafer

Columbus, OH · (614) 961-9989 · jon.g.schaf@gmail.com

Portfolio: jongschaf.com · github.com/Jon-G-Schaf · linkedin.com/in/jongschaf

Full-stack developer with a designer's eye. Computer Science graduate who designs the interface in Figma, then builds the whole product, from Flutter and Firebase on mobile to React and Next.js on the web. Looking for software and full-stack roles in Columbus, Cincinnati, Pittsburgh, or remote.

EDUCATION

Ohio University · B.S. Computer Science

Athens, OH · May 2026

Coursework: Algorithms, Databases, Operating Systems, Networking, Compilers, Cryptography, Parallel Computing

PROJECTS

Quorum · Local Events App (CS Capstone)

Aug 2025 – May 2026

UI/UX Lead & Full-Stack · Flutter, Dart, Firebase, Figma · five-person team

- Led all UI/UX and built much of the Flutter front end and Firebase back end for an app to find your next game, hangout, or meetup and connect when it fits your schedule
- Designed the complete interface in Figma and shipped it as a Material 3 design system with custom light/dark color schemes and runtime theme switching
- Designed the Firestore data model for users, events, groups, and chat, with realtime listeners and transactions for limited-spot joins
- Built real-time chat with read receipts, reactions, photo sharing, and shareable event cards, with event chat membership synced to attendance

Crosstown · Live Transit Reliability Tracker

2026 · crosstown.jongschaf.com

Solo · TypeScript, Node.js, Fastify, PostgreSQL, Next.js, MapLibre

- Built a 24/7 ingestion service that polls COTA's public GTFS-realtime feeds into Postgres and rolls every arrival up into route-by-route on-time stats with hand-written SQL
- Computes the arrival delays the feed doesn't publish by joining realtime predictions against the static schedule, set-based in SQL at roughly 10k upserts a minute
- Streams live positions to a Next.js + MapLibre map over server-sent events with client-side motion interpolation, tested with Vitest and GitHub Actions

Personal Portfolio

2026

Designer & Developer · Next.js, React, Tailwind CSS, Framer Motion

- Designed and built a fully custom site: one-accent design system, scroll-driven reveals, and a generative animated sand background built from layered SVG noise
- Code-generated Open Graph images and favicon, with keyboard-accessible and reduced-motion-aware interactions

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Dart, Python, C++, C, SQL, OCaml, HTML/CSS

Frameworks & Data: React, Next.js, Node.js, Fastify, PostgreSQL, Tailwind CSS, Flutter, Firebase, Qt/QML

Tools & Design: Git, Docker, Linux, GitHub Actions, Figma · UI/UX design, wireframing, prototyping, design systems

WORK EXPERIENCE

Liqua-Roof Southern Columbus · Roof Coating Technician

Columbus, OH · May 2025 – Present

- Primary sprayer for residential and commercial roof restoration coatings, including steep-slope roofs

The Sidebar · Bouncer / Barback

Athens, OH · Dec 2024 – Sep 2025

- Managed crowd safety, de-escalation, and policy enforcement in a high-volume nightlife venue

Muskingum University · Resident Assistant

New Concord, OH · Aug 2022 – May 2023

- Led a residence-hall floor of students: built community, mediated conflicts, and enforced policy while serving as the first point of contact for safety and emergencies
